Figure 1 displays two 22x22 grids illustrating the evolution of a 1D Ising spin chain over 22 time steps (rows) and 22 spatial sites (columns). The left grid shows the evolution starting from a single flipped spin at site 13, while the right grid shows the evolution starting from a single flipped spin at site 21. Red cells represent spin -1, and yellow cells represent spin +1. The grids illustrate the formation and movement of domain walls over time.

[illegible]

The diagram shows a 3D coordinate system with three boxes (ボックス) and their associated numbers. The boxes are labeled ボックス 席1, ボックス 席2, and ボックス 席3. The numbers are arranged in a grid-like structure. The numbers 1 through 10 are distributed across the boxes and their associated positions. The numbers 1 through 5 are in the first box, 6 through 10 are in the second box, and 1 through 5 are in the third box. The numbers 1 through 10 are arranged in a grid-like structure. The numbers 1 through 5 are in the first box, 6 through 10 are in the second box, and 1 through 5 are in the third box.
